Response to Arguments

1. Applicant's arguments filed 10/06/03 have been fully considered but they are not persuasive from the following reasons:

Under remarks, with respect to claims 1 and 14, applicant argued that Dent reference does not teach or disclose variable gain amplifiers having adjustable, examiner is respectfully traversed because Fig. 16 of Dent clearly disclose a variable gain amplifier (1620a, and 1620b) with adjustable gain in response to modulated power supply voltage (1670), which is controlled by controller 1660.

Under remarks, with respect to claims 1 and 14, applicant argued that Dent reference does not teach RF power detector coupled to and receiving the RF input signal, examiner is respectfully traversed because Fig. 16 of Dent is clearly teach the controller 1660 is a RF power detector coupled to received RF input signal.

Therefore the same ground of rejection from prior office action is applied to this final office action (See prior office action).
